Ginzinger electronic systems hereby declares that all products offered and sold in the member states of the European Union after 22 July 2012 are manufactured in compliance with directive 2011/65/EU on the "restriction of the use of certain hazardous substances in electrical and electronic equipment". Directive 2015/863/EU is more commonly known as the ROHS directive (restriction of certain hazardous substances). It regulates the restriction of the use of hazardous substances. As of 22 July 2012, only products in which the content of the elements and compounds listed below does not exceed the respective limit value may be put into circulation. Elements and compounds listed below do not exceed the respective limit value:

## 1. ROHS

- Lead (0.1%)
- Mercury (0.1%)
- Cadmium (0.01%)
- Hexavalent chromium (0.1%)
- Polybrominated biphenyls (PBB) (0.1%)
- Polybrominated diphenyl ethers (PBDE) (0.1%)
- Di(2-ethylhexyl) phthalate (DEHP) (0.1%)
- Butyl benzyl phthalate (BBP) (0.1%)
- Dibutyl phthalate (DBP) (0.1%)
- Diisobutyl phthalate (DIBP) (0.1%)

## 2. POP

- PFOA
- PFHxS
- PBDE
- HBCDD
- SCCP
- PCDD/F
- Dioxin PCB

## 3. SVHC Candidate List

Actual List, Status from 27.06.2024 from the echa homepage ([Candidate List of substances of very high concern for Authorisation - ECHA \(europa.eu\)](https://echa.europa.eu/candidate-list-table))

## 4. Conflict Minerals

The regulation covers minerals and metals of:

- Gold
- Tin
- Tungsten
- Tantalum

Ginzinger electronic systems GmbH is not directly affected by the **“Dodd-Frank Act” (Section 1502 of the U.S. Wall Street Reform and Consumer Protection Act)**, as the company is neither listed on a U.S. stock exchange nor a supplier to publicly listed U.S. companies.

Nevertheless, Ginzinger electronic systems GmbH is committed to fulfilling its corporate social responsibility and ensuring that the products we manufacture **do not contain any conflict minerals** (such as tin, tantalum, tungsten, and gold – collectively known as “3TG”) that directly or indirectly finance or support armed groups in the Democratic Republic of the Congo or adjoining countries.

Our procurement policy is aligned with the principles of **EU Regulation (EU) 2017/821**, which establishes supply chain due diligence obligations for importers of tin, tantalum, tungsten, their ores, and gold originating from conflict-affected and high-risk areas. We therefore also expect our suppliers to source materials exclusively from **conflict-free sources** and to ensure this within their own supply chains.

This statement follows to the best of Ginzinger electronic systems knowledge and belief. It is partly based on advance information provided to Ginzinger electronic systems by manufacturers and suppliers.

As a manufacturer of electronic products, Ginzinger electronic systems is a so-called "downstream user" in the sense of the REACH III regulation. You will only receive non-chemical products from us. Furthermore, under normal and reasonably foreseeable conditions of use, the products you purchase from us should not be subject to reasonably foreseeable conditions of use. Therefore, Ginzinger electronic systems is in principle not subject to the registration obligation or the obligation to prepare safety data sheets for its products.

In addition, we will inform you immediately if ingredients of our products are classified by the European Chemicals Agency (ECHA) as being of particular concern by the European Chemicals Agency (ECHA) (according to REACH-Art. 33, valid from a content of > 0.1%). As things stand at present, however, we do not expect that this will happen.

Irrespective of this, Ginzinger electronic systems pursues in its own interest, as well as for the guarantee of high product safety for its customers, the implementation of the REACH declaration on the part of our suppliers. There is a close contact to our distributors of chemical substances and preparations (e.g.

raw materials, auxiliary materials and operating supplies for the manufacture, treatment and processing of our products or for use in other operational processes) and we will integrate the pre-registration or later registration of the relevant substances in REACH into our supplier qualification.

On behalf of the management of Ginzinger electronic systems GmbH.

Weng im Innkreis, 19.11.2025

Ing. Erich Auer, MSc  
Quality Manager
